Courte biographie

Je suis Directeur de recherche au CNRS au Laboratoire d’Océanographie de Villefranche (Sorbonne Université). Je suis également chercheur associé à l’Institut du Développement Durable et des Relations Internationales (IDDRI-SciencesPo, Paris). Mes recherches portent sur les effets de l’acidification et du réchauffement de l’océan sur les écosystèmes marins et les services qu’ils rendent à la société. J’étudie également les solutions fondées sur l’océan pour atténuer le changement climatique et s’y adapter. J’ai dirigé le lancement de l’*Ocean Acidification International Coordination Centre* à l’Agence internationale de l’énergie atomique. J’ai coédité le premier ouvrage consacré à l’acidification des océans (Oxford University Press) et contribué à plusieurs produits du GIEC (5e Rapport d’évaluation, rapports spéciaux sur un réchauffement de 1,5 °C, et sur l’océan et la cryosphère). J’ai coprésidé le [One Ocean Science Congress](#), un événement spécial des Nations unies organisé en amont de la Conférence des Nations unies sur l’océan de 2025. J’ai reçu la médaille Vladimir Vernadsky de l’European Geosciences Union, la médaille Blaise Pascal de l’Académie européenne des sciences, le prix Ruth Patrick de l’*Association for the Sciences of Limnology and Oceanography* (ASLO), et suis Chevalier de la Légion d’honneur. Je suis membre élu de l’Académie européenne des sciences, de l’*Academia Europaea* et de l’Académie des sciences chinoise. Je suis également *Fellow* de l’ASLO ainsi que du programme ONCE (Ocean Negative Carbon Emissions). Plus d’informations : <https://jpgattuso.github.io>.
